# BATTERY CHARGING INSTRUCTIONS

Multipurpose Mobile Manipulator "Megamark"

Turn off all switches on robot top.

Press red button to turn off base.

For both left and right sides, slightly unscrew side panels and slide off.

For both sides, unplug yellow connector.

Finally, for both batteries, plug the battery to the charger by the yellow connector. Expected charge time for one battery is 8 hours. When done charging both batteries, reattach batteries to robot and close side panels. **Please recharge batteries after every 8 hours of use.**

(There is a red light on the robot's control board inside the top of the robot that turns on when batteries are low. This can be accessed by opening the robot's hood.)
